Fully Self-Contained **AUTOMATIC HARVESTER**

AutoStack 3

As the newest and most refined, high-production machine on the market, the Trebro AutoStack 3 is the ultimate in turf harvesting production. Along with Trebro's industry leading reliability, economy and time-tested value, it has the combination of tried and true design along with many new features that set it apart from all other turf harvesters on the market today.

... the newest and most refined high-production machine on the market.

The deluxe cab uses curved glass on the front and rear for outstanding visibility of all harvesting and stacking functions. The entire cab is mounted on anti-vibration mounts for a smooth quiet ride. Powered by a 140 HP engine with anti-spin traction control and large high flotation tires, the AutoStack 3 harvests through muddy and wet conditions with ease. When it turns hot and dry, the AutoStack 3 keeps harvesting thanks to its dual 24" cutting heads with independent down pressure, which produces an outstanding quality of cut with minimum waste. The Trebro AutoStack 3 quickly pays for itself thanks to its maximum productivity and sod quality with reduced waste and downtime. Turn your turf harvesting operation into a highly efficient one-man system. It's the original auto-stacking turf harvester and it's still the best. The future of turf harvesting is now!

FEATURES

- Improved weight distribution
- Mechanically synchronized vertical movement of forks and injector
- All-wheel drive with electronic anti-spin control
- Deluxe cab featuring joystick controls with large displays
- Curved glass front and rear windows for excellent visibility
- New hydraulic depth control is simple and precise

(continued)

Updated powered roll-up system with on-the-go electronic flap positioning.

24-in cutting heads with adjustable down pressure

Stadium lighting for harvesting at night

FEATURES continued

- Monitor with 4 camera views of harvester operations plus a rearview dedicated monitor
- The operator controls and console are conveniently positioned by the driver's seat that rotates 90 degrees putting the driver in the best and most comfortable position for harvesting
- Twin 24-in floating heads w/individual adjustable down pressure for improved sod quality
- Blade changing is easy and convenient with the cutting heads in the raised position
- Articulated steering for outstanding maneuverability; even in smaller fields
- Dual auto steering allows harvesting in both directions
- High flotation tires produce a light foot print minimizing marking and compaction
- Improved powered roll-up system with on-the-go adjustable flap positioning
- Updated roll-up system is easy on the turf and produces consistent tight rolls
- Stacker rotate uses a durable, low maintenance rotary actuator
- Improved accumulator scrap dump for on the fly scrapping of bad rolls
- Front to back stacker has 88 spears that gently transfers 10 rolls at a time to the pallet
- Simplified stacker uses hydraulic cylinders to activate the pick up spears
- Can be easily set to stack flat top or pyramid pallets of turf up to 9 layers high
- On-the-go automatic pallet injector with 20 pallet capacity with hydraulic doors
- Industry leading adjustable pickup and delivery pressure for tight stable pallets
- Proven Plus 1 Control System
- Telematics remote access system (optional)
- Onboard troubleshooting from operator's screen
- Powered by a John Deere 140 HP Diesel Engine

SPECIFICATIONS

Width of Cut.....	Two 24-inch cutting heads (2 X .61m)
Length of Cut.....	Electronically variable up to 81 inches (2.06m)
Thickness of Cut.....	Hydraulically adjusted
Pallet Size	.48 X 48 inch single faced (1.22m X 1.22m)
Cutting Knife.....	One piece with fingers
Steering.....	Articulated with Auto Steer
Weight	28,000 lbs. (12,701 kg)
Width	11 feet, 10 inches
Length	35 feet, 5 inches
Height	10 feet, 2 inches
Tires.....	.54 X 31 inch high flotation (1.37m X.79m)
Horsepower	140 HP John Deere
Transmission	Infinitely variable hydrostatic drive
Drivetrain	Planetary with hydraulic wheel motors
Traction Control	Electronic anti-spin

OPTIONS

Palletless Forks Pallet lifter for double sided pallets
Spare parts package 23-inch wide cut (58.42 cm)
Trebros Telematics with Remote Support Services

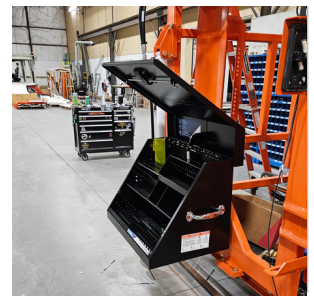

High comfort cab
